## Work

### Senior Front End Developer

#### *Optimum-web*

- 11. 2014 - Architected and led development in a team to build a Spotify-like application for a Series-A funded startup using Node.js, Electron/Chromium, and React.js.
- Built a bidirectional shipping integration API with Ruby on Rails for a very large affiliate network corporation.
- 06. 2016 - Managed an outsourced, overseas engineering team using Agile practices.
- Built a large front-end for a tax compliance platform with AngularJS and Bootstrap.
- Consulted for an early-stage startup and worked in a team to develop a single-page application using ReactJS, Flux, SASS, and ES6.

### Senior Front End Developer

#### *Optimum-web*

- Worked closely with the product team to build new features for the desktop and mobile site.
- 08. 2011 - Had a lead role on the small team that produced Yelp's first UI style guide, and then made it available to the public. The style guide precipitated an organization-wide push towards modular design.
- 
- 10. 2014 - Completely rebuilt Yelp's most important page--the business page--from scratch, using advanced CSS features for layout and interaction.
- Led the development of a complete overhaul of all email templates, including Yelp Weekly, which is sent to millions of users per week.
- Gained unique experience working on a large-scale software project with hundreds of contributors. Learned extensively about release engineering, including testing and deployment, as well as common web security vulnerabilities.

### Junior Front End Developer

#### *Optimum-web*

- 05. 2007 - Built WordPress themes.
- 
- 07. 2011 - Maintained WordPress sites.
- Developed a web shop based on WordPress.
- Managed hosting for about twenty sites.
- Maintained Joomla sites.
